Sprint 2 changes:

1. Smaller gaps on CV to improve formatting
2. Personal Statement Tooltip removed and made permanent text on page
3. Personal attributes tooltips are now displayed on page when checked
4. Personal attribute texts no longer overlap with other attributes
5. Change text to text area for Extracurricular Activities/Achievements sections
6. Placeholder examples displayed on empty fields
7. Date selectors implemented instead of manual inputs
8. Remove Buttons now available on all addable sections and sub sections
9. Section Navigation Tabs now change colour to highlight when the page they belong to is shown
10. Back Button on first slide removed
11. Automatically resize section tabs when browser size changes
12. Fixed required tags on attempted completion, including checks for valid emails, and jump to the slide where the first error occurs
13. Remove carousel side arrows

Sprint 3 changes:

1. Personal Attributes page restyled - tooltips now permanently displayed
2. If a CV is loaded with 6 attributes, selecting another is no longer possible
3. Default number of subject fields is now 5, rather than 6
4. If "No license" is selected, then driver's license is not displayed on CV
5. Placeholders and tooltips now load for any fields added during editing
6. Blocks of text are now no longer broken up if they would otherwise span multiple pages on CV
7. CV generation now does not include empty fields
8. Certain characters now unable to be typed in fields where they are irrelevant
9. Fields now all have length limitations based on number of characters
10. End date now disabled if start date not filled in, and end date not saved if start date not filled out
11. Start and end dates now must make chronological sense
12. Automatic testing now partially implemented
